

**MICHIGAN OCCUPATIONAL AND ENVIRONMENTAL  
MEDICINE ASSOCIATION**

**EDUCATIONAL MISSION STATEMENT**

The Michigan Occupational and Environmental Medicine Association (MOEMA), a component society of the American College of Occupational and Environmental Medicine (ACOEM), is dedicated to the provision of educational activities specifically designed for physicians in the Michigan and surrounding region who practice or are interested in learning more about occupational and environmental medicine (see attached "Mission for Occupational & Environmental Medicine"). Students and non-physician health and safety professionals may also attend MOEMA educational programs. The Scope of activities will include seminars, conferences, dinner meetings and/or other didactic events. Currently such events include an annual conference, typically of two days duration, a fall half-day seminar as part of the Michigan State Medical Society conference, and a fall keynote speaker dinner meeting in conjunction with the Michigan State Medical Society conference. Additional didactics are currently under development. Educational needs will be established based upon a needs assessment. Faculty will be selected based upon both their expertise in the field and their teaching ability. Facilities shall be selected on the basis of location convenient to potential attendees, appropriateness for educational events, and other practical considerations. The events will be designed to be consistent with the educational mission of ACOEM (see attached, "ACOEM's Educational Mission Statement").
